👤 ABOUT ME

Passionate software developer with over one year of experience in backend development and four years in frontend development. Skilled in designing and implementing robust solutions, tackling complex challenges, and exploring emerging technologies.

💼 PROFESSIONAL EXPERIENCE

TeleVisit ↗

09/2025 – Present | Tehran, Iran

Full-Stack Software Engineer

- Developed a telemedicine platform serving **50,000+ patients** and **500+ doctors**, featuring AI-powered symptom analysis that reduced specialist search time by **60%**.
- Engineered an emergency detection system achieving **92% accuracy** and built a real-time video consultation system supporting concurrent users.
- Implemented a patient-doctor matching algorithm with **85% accuracy** across **63 medical specialties**.

Full-Stack Freelancer

03/2023 – Present

Django / Next.js

- Designed and developed end-to-end web applications (Django/Next.js) including admin panels, REST APIs, and real-time features.
- Implemented core systems: authentication, role-based access control (RBAC), payment gateways, and optimized database queries.
- Deployed and maintained production systems using Linux, Nginx, Docker, and CI/CD pipelines.

Kelaasor ↗

12/2024 – 05/2025 | Tehran, Iran

Python/Django Intern

- Gained hands-on experience in backend development with Django.
- Contributed to features that improved overall user engagement on the platform.

💻 PROJECTS

Personal Retro Portfolio ↗

12/2025 – Present

- Built a responsive, terminal-inspired portfolio with a neofetch-style hero section, ASCII art, interactive animations, and a light/dark theme toggle.

Study & Focus Tracker ↗

11/2025 – Present

Full-stack web app with Telegram integration

- Developed a gamified web app with a Telegram bot integration for logging study sessions, leading to increased user motivation and study time.

Backend for E-commerce Aggregator ↗

04/2025 – 05/2025

- Built the backend for a price comparison platform, designing the database schema and implementing high-performance APIs for product search and filtering.

User/Admin panel

at kelaasor

- Engineered a real-time dashboard for a learning platform, directly contributing to a **20% rise in user engagement.**

06/2025 – 04/2025

Personal cloud storage

06/2025 – 07/2025

- Developed a personal cloud storage service as a technical challenge, successfully deploying it with Docker on a Linux server within one week.

SKILLS

Back-End

Python — Proficient

Django — Proficient

REST API — Expert

Golang — Amateur

Redis — Proficient

PostgreSQL — Expert

Front-End

React — Competent

Vite — Proficient

Next JS — Proficient

TypeScript — Competent

Tealwind — Expert

DevOps / Extras

Docker — Competent

Linux — Proficient

Cloudflare — Expert

Algorithms & Data Structures — Competent

Education

Software – Associate Degree

10/2025 – Present | Iran, Tehran

Islamic Azad University, Yadegar Imam Khomeini (RAH) branch 

COURSES

Python-django bootcamp

12/2024 – 08/2025 | Iran-Tehran

Kelaasor

AI-Powered Web Development Bootcamp

12/2025 – Present | remote

SharifGPT

The Fullstack Developer Path course

05/2023 – 07/2024 | remote

Scrimba
